# **Basic Packing Tips**

#### Repurpose items for padding

Quilted blankets, old towels and other similar items work well to protect fragile possessions and other easily breakable items.

#### Start with out-of-season items

First, pack away possessions that you aren't currently using on a daily basis. This will help you to avoid digging through boxes before you actually begin the moving process.

#### Label your boxes by room

Save time during the unpacking process by writing on the side of each box the contents and which room they're destined for.

#### Layer from heaviest to lightest

Always pack items in a box by weight, with the lightest at the top.

#### Organize your cords

Carefully wind electrical cords and store them in clear, labeled plastic bags.

#### Don't overpack

Make sure the items inside are secure and packed firmly together, but make sure the items are not misshaping the box.

#### Start early

No matter how much stuff you have, getting a head start on packing is never a bad idea. Begin boxing up items several weeks in advance.

#### Put heavy items in compact boxes

Pack weightier items, like books, in smaller containers so they are easier to move.

#### Use packing tape

Duct tape simply won't work in this scenario, so it's important to secure your boxes with packing tape.

#### Pack an overnight bag

Reserve your most-used items for last, and make sure you have a box set aside with necessities for your first night in your new home.

## **Moving Checklist:**

### **Day Before Moving Day**

#### Working with the packers:

- □ Talk with the packers about any fragile items that may require special attention.
- Group similar items so they will be packed together.
- □ Label items that you don't want to be moved or packed.
- Unplug all electronics at least a day in advance of the move so they have time to cool off.

#### Last-minute details:

- Double check cabinets, bookshelves and drawers for any items that need to be packed for the move.
- Make sure your phone is on and you are at home when a representative prepares your appliances for shipping.
- Arrange for your utilities to be disconnected after your move date.

### **Moving Day**

#### Working with the mover:

- Stay at your home until all loading is finished, then make a final sweep of the house and check and sign the inventory. Make sure you receive a copy from your moving representative.
- Give the truck driver your cell phone number and the exact address of your new home.

#### Take a last look around:

- □ Water shut off?
- □ Furnace shut off?
- Lights shut off?
- □ Windows shut and locked?
- □ House keys surrendered?
